"As we embark on our educational journey that will prepare our children for their place in the 21st century -- a place that will afford them the skills to be successful in the workplace and as members of society -- we have put into place a program that will allow students the opportunity to make their own decisions and take responsibility for their learning. Students have the opportunity to choose programs of study best suited to their particular interests, abilities and learning needs."

Dr. Joyce F. Baynes,
Superintendent

Who We Are

Dwight Morrow High School is a diverse school community situated on a picturesque 17-acre campus in Bergen County. Our mission is to provide educational excellence by creating a learning environment that empowers all children to develop character and to master the academic skills necessary for success as individuals and as members of a global community.

Our Vision

Selected as one of the state's first ten school choice districts in 1999, Dwight Morrow High School is initiating a magnet schools program that will not only enhance the high school experience for its own students but will be available for students from other districts as well.

The School of International Studies and Business, with its Academy of Finance opened in September, 2000. The School of Applied Sciences and Technology with its Academy of Information Technology and the School of the Arts and Communications with its Academy of Design will open in 2001.

We believe the smaller setting provided by these "schools within a school" will promote better learning, foster closer relationships between teachers and students and provide students with real-world experience. Our aim is to empower students to successfully articulate their interests and to experience substantive curricula during their high school years.

"I feel a sense of pride that the Department of Education has selected Englewood as one of the districts to participate in the School Choice Program. The Superintendent and high school staff have been working diligently to develop new courses and programs. This will allow our students and those outside the school district the opportunity to achieve success as individuals and as members of a global community."

Wellner Anderson,
Board President

Interdistrict School Choice

The opportunities are far-reaching

SCHOOL OF INTERNATIONAL STUDIES AND BUSINESS

Students who decide to study in this magnet school will be able to choose from specially designed courses that include an international studies curriculum. They will be able to choose courses in global studies, international law and human rights. Classroom instruction will be integrated with workplace experiences and business internships. With a school population that presently encompasses more than 20 ethnic groups and students who speak more than 10 different languages, we offer a diversity that enhances the international focus of this magnet school. It is a representation of a 21st century workplace that relies on individuals with multi-cultural sensibilities and multi-lingual abilities.

ACADEMY OF FINANCE

A school within a school this Academy features a specialized three-year study that includes core subject areas and specialized courses in Financial Services, Economics and the World of Finance and Banking and Credit to name a few. Classroom instruction is integrated with field trips to banks, brokerage houses and other financial institutions, workplace experiences and internships.

Business Partnerships

Internships are a necessary part of the Magnet Schools Program at Dwight Morrow High School. Each magnet school offers several choices. For example, the School of International Studies and Business seeks businesses and corporations that will work with our students to compliment classroom knowledge by exposing the students to the real world of business.

The district is accepting applications for September 2001 from students who live within 20 miles of the Englewood Public School District.

Interdistrict School Choice

SCHOOL OF APPLIED SCIENCES AND TECHNOLOGY

As students learn how science, mathematics and technology are used in the world today they will have the opportunity to explore career possibilities for the future. Three programs are included in this school --- Biological and Health Sciences; Physical Sciences and Engineering; and Information Technology. The curriculum in all programs will stress the intradisciplinary and interdisciplinary nature of science and technology.

SCHOOL OF THE ARTS AND COMMUNICATIONS

A wide selection of courses in studio arts --- drawing, painting, photography, crafts, ceramics and industrial arts --- is offered as well as film and video courses. The high school has a student newspaper, literary magazine, Tower Players, a theatre group that has been in existence for over 30 years, marching, jazz and steel drum bands and vocal music. Exhibitions and performances are integral components of this school.

An Academy of Information Technology and an Academy of Design will be housed within the related magnet schools.

"Our school is in active transition to better prepare our students for the challenges of the 21st Century. We encourage our students to connect with the community and local business through internship programs. Our students will investigate the global implications of social and economic policies, learn how to focus their thinking and be creative in the formation of new ideas and initiatives."

Arnold T. Oftedal,
Principal, DMHS

College and University Partnerships

We want our students to be able to explore the educational choices that will be available to them when they graduate. We are developing collaborations with institutions of higher learning such as Columbia University, Rutgers University and the Woodrow Wilson Institute at Princeton University as well as local universities and colleges. Students will be able to work with university and college professors on independent research.

Ninth Grade and Onward

The ninth grade students are housed in the South Building and are grouped in one of two teams. Each team is comprised of English, mathematics, science and social studies instructors who teach the core courses. The core curriculum plus world language and electives are included in the ninth grade program. A range of offerings, including honors courses, is available.

Community Partnerships

Advisory boards are established for each of the three magnet schools with members from the Englewood Community Foundation, the Englewood Rotary Club, Arts Horizon and many community members who have interest and expertise in the three theme areas. Another important affiliation is with the Academy for the Advancement of Science and Technology in Hackensack.

Out-of-District Applicants

Our selection as a School Choice District by the New Jersey Department of Education means that Dwight Morrow High School is now able to accept students from other school districts. If you live within 20 miles of the Englewood school district and would like to apply please note the following timelines for the application process:

Inform your current district with a Notice of **Intent to Participate in School Choice** by

November 1, 2000

Your current district must **notify** you by

November 25, 2000

as to whether you may or may not participate

Your application to Englewood must be received by

December 5, 2000

Englewood will notify you of your acceptance or rejection by

January 5, 2001

You must file a Notice of **Intent to Enroll** by

January 15, 2001

There are 50 ninth-grade openings and 25 tenth-grade openings. Since seats are limited you are encouraged to follow the above timelines. However, applications will be accepted, if seats are available, in the second cycle that begins in March, 2001.

Any interested families or students may contact Ms. Maria Satterfield, Assistant Principal, DMHS, 833-6145 or one of the following offices: Office of School Operations, Dr. Richard Segall, 833-6185; or Office of Public Relations, 223-2303. All necessary documents are included in application packets.

Sheree Huggins explains a point to her committee in AP US History class.

Photography II student Joanne Bautista working in the photo lab.

Ms. Evelyn Sanchez helping Camille Shaw perfect her reading comprehension skills.

9th Grade Team Parent Conference

Robotics student Phillip Mofuany perfecting his vehicle for a robotics competition.

Photography teacher Jack Surran showing Crystal Brown the use of the digital drawing tablet with Adobe Photoshop in Photography II class.

Interdistrict School Choice

Dwight Morrow High School

Robotics

A state-of-the-art program that produced a real working robot with both video and audio capabilities as well as working hands --- that is what students in the robotics classes built. Combining imagination, creativity and engineering skill students enjoyed the excitement of completing this very remarkable project.

Studio Arts

An award winning art department with teachers who are professional and exhibited artists --- DMHS students study and work in this environment. Exposing students to the world of art and art appreciation and revealing their potential to them while they explore, learn, produce and have a good time opens other doors in the students' educational ventures.

Extra-Curricular Activities

The Law Club, a DMHS institution that has been active for over 30 years, offers students an opportunity to get hands-on experience in case preparation for Mock Trial competition and to learn how the US Congress works. Students simulate actual cases provided by the NJ Bar Association. The Model Congress participation provides students with the actual workings of the government when they learn how to identify issues, write-up laws and get them passed.

Athletics and team play are other dimensions of the students' education. Highly ranked with a 1999-2000 season of a 21 game winning streak going into the state finals, the Boys Basketball Team is consistently outstanding. The team was Sectional Two, League and County Champions --- a distinction that no other high school in the section has achieved since 1960. The coaching staff is excellent and they promote scholarship as well as athletics.

If you will be a ninth or tenth grader in September 2001 and you are attracted to our magnet schools program, come join the Dwight Morrow High School family.

Salem Pathways

Choose Public Choice with

Salem Pathways

New Jersey's Interdistrict Public Choice Program makes it possible for students from all over South Jersey to come to Salem for outstanding programs not available to them in their community high schools — and it is FREE to everyone!

What's better is that our buses will drive you here from anywhere within 20 miles of Salem — and it's FREE!

Also, sending a student to Salem's Pathways is free for your home district. They pay NO tuition and incur NO costs for the students who attend Salem. That can reduce your taxes!

Salem High School is the only school in Camden, Gloucester, and Salem Counties whose high quality programs were approved for Public Choice designation by the State of New Jersey.

The opportunity is here to pursue innovative, exciting, and challenging courses of study in a "School Within a School" concept that will prepare you for college and careers beyond that in areas rarely found in a high school.

In the end you'll have college experience and college credit from high school, internship and entrepreneurial experience, certifications, and a very bright future for college.

Where Do Salem Students Attend College?

University of Virginia
